PROFESSIONAL SUMMARY

Full Stack Developer with 2.6 years of professional experience across 3 organizations, with a strong focus on backend development using Node.js and Express.js. Skilled in designing and building RESTful APIs, working with MongoDB, PostgreSQL and MySQL, and implementing authentication, error handling and third-party API integrations for reliable backend services. Also experienced with React.js for frontend-backend integration. Hands-on with AWS (EC2, S3), Docker and CI/CD pipelines for deployment; currently building foundational knowledge of Microsoft Azure (App Services, Storage, Functions, DevOps).

CORE SKILLS

Backend : Node.js, Express.js, REST API Development, JWT Authentication, Asynchronous Programming, Event-Driven Architecture, JavaScript (ES6+), TypeScript

Frontend : React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Web Design

Database : MongoDB, PostgreSQL, MySQL

Cloud & DevOps : AWS EC2, AWS S3, Docker, CI/CD Pipelines, Git, GitHub, Hostinger, Linux

Microsoft Azure : Basic Knowledge / Currently Learning — Azure App Services, Azure Storage, Azure Functions, Azure DevOps

Libraries & Tools : Redux, Zustand, Zod, Socket.IO, WebSockets, TCPDF, Firebase, Supabase

WORK EXPERIENCE

Full Stack Developer, Concepts, Coimbatore

Apr 2026 – Present

- Designed and implemented a multi-tier dealer management system (National down to Sub-District level) with Node.js and Express.js backend APIs, providing role-based access control for admins to manage customers, assets and service workflows.
- Developed backend services for technician allocation and service-ticket workflows, integrating real-time GPS-based geolocation tracking through a technician mobile application.
- Built automated tracking logic that triggers on service-ticket acceptance and terminates on task completion, improving service visibility and operational reliability.
- Integrated frontend and backend components to ensure seamless data flow across admin and technician-facing interfaces.

Full Stack Developer, CloudZoo India Softwares Pvt Ltd

Oct 2024 – Feb 2026

- Developed and maintained core ERP backend modules using Node.js and Express.js, handling data storage, form processing and business logic integration.
- Built a Mill Software module for daily production data entry and automated, date-based report generation using the TCPDF library.
- Implemented and maintained backend features for database-driven business applications, improving data accuracy and workflow efficiency.
- Troubleshoot and resolved backend issues to improve application reliability and support ongoing feature development.

Software Developer, SuperLabs, Bangalore

May 2024 – Oct 2024

- Developed and deployed a steel industry web application using the MERN stack (Node.js, Express.js, React.js, MongoDB), including company profile, industry details and demo booking modules.
- Built backend API integration for lead management by connecting the application with Google Forms.
- Customized and optimized Shopify eCommerce websites using Liquid, improving UI/UX and responsive design.

PROJECTS

Privora – Personal Finance Tracking App

- Built REST API backend using Node.js, Express.js and MongoDB to manage daily expenses, debits, credits and monthly payments for a React Native mobile app.
- Integrated Supabase Cloud Storage for secure storage and management of user attachments and documents.
- Developed a restricted admin web dashboard for administrators to securely create and manage user accounts.

Food Ordering Web Application

- Built a full-stack food ordering platform using Node.js, Express.js, MongoDB and React, with REST APIs for food management, cart and order processing.
- Integrated Stripe dummy payment gateway for checkout functionality and developed an admin panel for managing food items and orders.

EDUCATION

MCA (Master of Computer Applications) – Bharathiyar University, Coimbatore

B.Com (Computer Applications) – K.S.R College Of Arts And Science, Tiruchengode (Jun 2021 – May 2024)
