PROFESSIONAL SUMMARY

Full Stack Developer skilled in REST APIs, authentication and role-based access control across Node.js/Express.js, PHP/Laravel and React.js/React Native, with MongoDB, PostgreSQL and MySQL. Delivered a national-to-sub-district dealer platform with real-time GPS tracking, ERP reporting modules and a garment manufacturing ERP with an LLM-powered assistant (Groq, OpenAI) and n8n workflow automation, owning features end-to-end through AWS/Docker deployment and CI/CD.

CORE SKILLS

Backend Development	Node.js, Express.js, PHP (Laravel), REST API Design & Development, JWT Authentication, Webhooks, Asynchronous Programming, Event-Driven Architecture, JavaScript (ES6+), TypeScript
AI & LLMs	Groq, OpenAI API (GPT models), LLM Integration, Prompt Engineering, AI Assistants over Live Application Data
Automation	n8n Workflow Automation, WhatsApp API, Resend (Email), Scheduled Jobs, Automated PDF Reporting
Frontend & Mobile	React.js, Next.js, React Native, Redux, Zustand, HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery, Responsive Web Design
Databases	MongoDB, PostgreSQL, MySQL, Schema & Data Modeling
Cloud & DevOps	AWS (EC2, S3), Azure, Docker, CI/CD Pipelines, Git, GitHub, Linux, Hostinger
Libraries & Tools	Socket.IO, WebSockets, Zod, TCPDF, Firebase, Supabase

WORK EXPERIENCE

Full Stack Developer — Concepts, Coimbatore Apr 2026 – Present

- Designed and implemented a multi-tier dealer management system (National down to Sub-District level) using Node.js and Express.js, with role-based access control for admins to manage customers, assets and service workflows.
- Developed backend services for technician allocation and service-ticket workflows, integrating real-time GPS-based geolocation tracking through a technician mobile application.
- Built automated, event-triggered tracking logic that starts on service-ticket acceptance and terminates on task completion, improving service visibility and operational reliability.

Full Stack Developer — CloudZoo India Softwares Pvt Ltd Oct 2024 – Feb 2026

- Developed and maintained core ERP backend modules using Node.js and Express.js, handling data storage, form processing and business logic integration across relational and NoSQL databases.
- Built a Mill Software module for daily production data entry and automated, date-based report generation using the TCPDF library, and resolved backend issues to improve application reliability.

Software Developer — SuperLabs, Bangalore May 2024 – Oct 2024

- Developed and deployed a steel industry web application using the MERN stack (Node.js, Express.js, React.js, MongoDB), including company profile, industry details and demo booking modules.
- Built backend API integration for lead management via Google Forms, and customized Shopify eCommerce websites using Liquid for improved UI/UX.

PROJECTS

Garment Manufacturing ERP with AI Assistant & Automation Laravel | React.js | n8n | Groq

- Built a full-stack garment manufacturing ERP unifying CRM, quotations, invoices, orders, production management, employee assignments and PDF reporting in one platform.
- Implemented the lead-to-order pipeline: leads from web forms, referrals and public webhooks are auto-assigned to sales reps, with WhatsApp and email notifications.
- Developed the production workflow (Knitting, Dyeing, Cutting, Stitching, Packing, Quality Check) with stage updates and employee assignments linked to automated notifications.
- Integrated a Groq LLM-powered AI assistant that queries live ERP data through n8n and Laravel APIs, answering natural-language questions on orders, leads and invoices.
- Automated Resend emails, WhatsApp alerts, PDF process sheets and business reports, plus daily deadline checks that notify responsible team members.

Privora – Personal Finance Tracking App Node.js | MongoDB | React Native

- Built a REST API backend using Node.js, Express.js and MongoDB to manage daily expenses, debits, credits and monthly payments for a React Native mobile app.
- Integrated Supabase Cloud Storage for secure storage of user attachments and documents, and developed a restricted admin web dashboard to securely create and manage user accounts.

Food Ordering Web Application MERN | Stripe

- Built a full-stack food ordering platform using Node.js, Express.js, MongoDB and React, with REST APIs for food management, cart and order processing.
- Integrated a Stripe dummy payment gateway for checkout, developed an admin panel for managing food items and orders, and implemented cart and order tracking.

EDUCATION

MCA (Master of Computer Applications) — Bharathiyar University, Coimbatore

B.Com (Computer Applications) — K.S.R College of Arts and Science, Tiruchengode

2021 – 2024
